

FLOCK OUT FRENCHTOWN

SAY NO TO MASS SURVEILLANCE

Automated License Plate Readers (ALPRs) are invading our community. Your daily routines, commutes, and family trips are being logged into automated databases without your explicit consent. **It's time to protect our privacy.**

CONTINUOUS TRACKING

Unlike standard security tools, these systems capture and index details on every vehicle passing through, turning everyday citizens into data points.

ZERO PUBLIC VOICE

Decisions regarding network expansion, data access permissions, and retention timelines often happen with minimal community feedback or transparency.

DATA LEAK RISKS

Centralized tracking networks create high-value targets for data breaches, exposing local travel patterns and resident behavior to third parties.

A SLIPPERY SLOPE

Accepting unmonitored mass surveillance today builds the systemic legal and physical infrastructure for expanded tracking of neighborhoods tomorrow.

TAKE ACTION TO STOP IT

Attend the upcoming township meetings, voice your objections to local officials, and ensure our shared neighborhood values safety without sacrificing fundamental privacy rights.
